WOMEN MAKING ART SINCE 1990

*May your season be bountiful
and the new year full of inspiration*

For many of us, the act of creation is a sanctuary, a space to confront and process personal feelings, both sorrow and joy. As paint meets canvas or fingers mold clay, there's a release, a purging of pent-up emotions, offering both healing and clarity. Some are driven by the love of beauty; for others it dives into the depths of pain, chaos and the disorder of our existence.

WHY DO YOU CREATE? Please share for our January newsletter and let us know what your current project is.
